

## Plumbing Permit Application Requirements (New Residential/Additions/Renovations)

- A. Submit (2) sets of legible scaled floor plans with fixture & appliance locations.
- B. Indicate whether the property has public water/sewer or well/septic.
- C. Submit (2) sets of drainage & venting schematics with material type and sizing.
- D. Submit (2) sets of water piping details and/or schematics with material type and sizing.
- E. Submit (2) sets of gas piping details:
  1. Material type
  2. Schematic showing sizing
  3. Appliance locations with BTU of appliances
  4. Total distance from meter to most remote appliance
  5. If adding to existing gas, provide #1 - #4 above and details of new piping
- F. Submit (2) sets of details on HVAC system to be installed:
  1. BTU load of heater
  2. Duct schematic with sizing of supply and return, if applicable
  3. Boilers: provide schematic for the hydronic piping
- G. Submit plumbing technical application with all applicable sections completed.
- H. Providing a written scope of work can be helpful for review, especially for renovation work of existing homes.

Example: "Remodel existing bath—replacing fixtures only in same locations and connecting to existing piping" or "replacing fixtures and also putting in 5' new drainage piping and 10' new water piping."

- I. The above requirements may be submitted if:
  1. The homeowner if:
    - a. It is his/her primary residence
    - b. He/she is actually doing the work
  2. New Jersey licensed Architect/Plumbing contractor. Mechanical contractor may submit HVAC details. Gas details may be submitted by any of the above, including homeowner.
