#### **SYSTEM SPECIFICATIONS**

The requirements listed in the following represent the minimum requirements for this surveillance system. These specifications are intended to cover the furnishing of all materials and the performance of all work that may be required or necessary for the complete compliance of the contract and the contractor will be required to do all things.

Where plans and drawings accompany certain sections of the specifications, these shall be considered as a part of these specifications.

All equipment and materials used shall be standard components that are regularly manufactured and utilized in the manufacturer's system.

All equipment and components shall have been thoroughly tested and proven in actual use.

- 1) Video surveillance has to deliver images with a minimum resolution of 1536 lines per image per camera in order to guarantee that persons and objects can be identified properly in the live images.
- 2) The camera images need to be recorded with at least 1536 image lines in order to guarantee that persons and objects can be identified properly in the stored images.
- 3) The system has to allow for simultaneous display and storage of the live images as well as the display of the stored images and video sequences without the risk of losing data.
- 4) The system needs to be able to record at least 20 smooth video streams simultaneously on one standard computer. The recorded video streams need to contain at least 10 images per second.

- 5) To reduce costs, the camera system should not require additional power lines for heating or cooling the cameras. Instead, power should be supplied via the network cabling (e.g. Power-over-Ethernet)
- 6) The system needs to be able to operate in outdoor applications at temperatures between 0°F to 140°F without any additional heating or fan in the surveillance cameras. This will reduce maintenance and power consumption to a minimum, thus providing for cost-efficient protection of the whole system using uninterruptible power supplies.
- 7) The cameras should not have to rely on any moving parts such as auto iris, mechanical filters, motors, fans or similar. This ensures that the complete system is highly reliable and maintenance-free.
- 8) The surveillance cameras need to be able to bridge at least a one minute failure of the data connection or the storage device without losing any storage data, images or video sequences. This requirement is due to the wireless connectivity of this scope.
- 9) The camera system will support contingency mechanisms to ensure operation during a natural or other disaster. The surveillance cameras must provide onboard, fail-over storage in the event of the loss of the long term recording device or network failure.
- 10) The cameras need to employ wide-angle lenses with an image angle of 90 degrees or more so that the monitored areas are covered as efficiently as possible.
- 11) The camera system must be easily scaled and upgraded in a modular fashion to support additional cameras.
- 12) The contractor/ installer must be manufacturer certified and trained on the equipment being installed.
- 13) The housing and the materials have to be chosen in such a way that the cameras have a life expectancy of at least five years. The camera enclosure shall be waterproof under normal and severe rain conditions. The camera enclosure shall be constructed of a material that is rugged and not subject to heat or distortion under extreme outdoor / weather conditions; nor should it be generally subject to damage or tampering.
- 14) The surveillance system needs to include video management software for camera management and playback/export of recorded images at NO additional licensing cost for as many computers as necessary.
- 15) The camera system and wireless transmission system must be secure to prevent unauthorized access and provide layers of access security for authorized users.
- 16) The surveillance cameras need to be able to output voice messages and to react to sounds in the camera perimeter and to trigger alarms accordingly. The system needs to play back and store the audio signals in a lip-synchronous manner.

17) The surveillance cameras and system must be able to provide email notification of system failures and events including hard drive errors, recording system offline, system startup, camera shock and tamper detection.

18) Bidders must have experience in deploying IP-based video surveillance cameras systems for municipalities and law enforcement agencies and be able to provide point-to-point wireless communications services.

19) As a software-based solution, rather than a hardware-based application, the newest features and developments must be easily incorporated into the deployed solution through future software upgrades.

## CONSTRUCTION CONTRACT

During the performance of this contract the contractor agrees as follows:

- 1) The contractor or subcontractor, where applicable, will not discriminate against any employee or applicant for employment because of age, race, creed, color, national origin, ancestry, marital status, or sex. The contractor will take affirmative action to ensure that such applicants are recruited and employed, and that employees are treated during employment, without regard to their age, race, creed, color, national origin, ancestry, marital status or sex. Such action shall include, but not be limited to the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the Public Agency Equal Employment Opportunity Officer setting forth provisions of this non-discrimination clause.
- 2) The contractor or subcontractor, where applicable, will in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to age, race, creed, color, national origin, ancestry, marital status or sex.
- 3) The contractor or subcontractor, where applicable, will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the Public Agency Equal Employment Opportunity Officer advising the labor union or worker's representative of the contractor's commitments under this act and shall post copies of the notice in a conspicuous place available to employees and applicants for employment.
- 4) The contractor or subcontractor, where applicable, agrees to comply with any regulations promulgated by the Treasurer pursuant to P.L. 1975, c 127, as amended and supplemented from time-to-time.
- 5) When hiring workers in each construction trade, the contractor or subcontractor agrees to attempt in good faith to employ minority workers in each construction trade consistent with applicable employment goal prescribed section 7.3 of said regulation; provided however, that the Affirmative Action Office may, in its discretion, exempt a contractor or subcontractor from compliance with the good faith procedures prescribed by the following provision 1, 2 and 3 as long as the Affirmative Action Office is satisfied that the contractor is employing workers provided by a union which provides evidence, in accordance with standards prescribed by the Affirmative Action Office, that its percentage of active "card

carrying” members who are minority workers is equal to or greater than the applicable employment goal prescribed by section 7.3 of the regulations promulgated by the treasurer pursuant to

P.L. 1975, c. 127, as amended and supplemented from time-to-time. The contractor or subcontractor agrees that a good faith effort shall include compliance with the following procedures:

- A. If the contractor or subcontractor has a referral agreement or arrangement with a union for a construction trade, the contractor or subcontractor shall within(3) days of the contractor award, seek assurance from the union that it will cooperate with the contractor or subcontractor as it fulfills its affirmative action obligations under this contract and in accordance with the regulations promulgated by the Treasurer pursuant to P.L. 1975, c. 127, as it is supplemented and amended from time-to-time. If the contractor or subcontractor is unable to obtain said assurance from the construction trade union at least five(5) days prior to the commencement of construction work, the contractor or subcontractor agrees directly to attempt to hire minority workers consistent with the applicable employment goal. If the contractors’ or subcontractors’ prior experience with a construction trade union regardless of whether the union provided said assurance indicates a significant possibility that the trade union will not refer sufficient minority workers consistent with the applicable employment goal by complying with following hiring procedures prescribed under(2): and the contractor or subcontractor further agrees immediately to take said action if it determines or is so notified by the Affirmative Action Office that the union is not referring minority workers consistent with the applicable employment goal.
- B. If the hiring of a work force consistent with the employment goal has not or cannot be achieved for each construction trade by adhering to the procedures of the preceding provision(1), or if the contractor or subcontractor does not have a referral agreement or arrangement with a union for a construction trade, the contractor or subcontractor agrees to take the following actions consistent with the applicable county employment goal:
  1. To notify the Public Agency Compliance Office, Affirmative Action Office and at least one minority referral organization of its manpower needs and request the referral of minority workers;
  2. To notify any minority workers who have been listed with it as awaiting available vacancies;
  3. Prior to commencement of work, to request the local construction

trade union if the contractor or subcontractor has a referral agreement or arrangement with a union for the construction trade, to refer workers to fill job openings;

4. To leave standing requests for additional referral of minority workers with the local construction trade union, if the contractor or subcontractor has a referral agreement or arrangement with a union for the construction trade, the State Training and Employment service and the other approved referral sources until such time as the work force is consistent with the employment goal;
5. If it is necessary to lay off some of the workers in a given trade on the construction site, to assure consistency with the applicable State and Federal Statutes and Court decisions, that sufficient minority employees remain on the site consistent with the employment and to employ any minority workers laid off by the contractor or any other construction site in the area on which its work force composition is not consistent with any employment goal established pursuant to the regulations implementing P.L. 1975, c. 127;
6. To adhere to the following procedure when minority workers apply or are referred to the contractor or subcontractor:
  - i. If said individuals have never previously received any document or certification signifying a level of qualification lower than that required, the contractor or subcontractor shall determine the qualifications of such individuals and if the contractor's or subcontractor's work force in each construction trade is not consistent with the applicable employment goal, it shall employ such persons which satisfy appropriate qualification standards; provided however, that a contractor or subcontractor shall determine that the individual at least possesses the skills and experience recognized by any workers skills and experience classification determination which may have been made by a Public Agency Compliance Officer, Union, Apprentice Program or a Referral Agency, provided the Referral Agency is acceptable to the Affirmative Action Office and provided further, that if necessary, the contractor shall hire minority workers who qualify as trainees pursuant to subsection 2(k) of these regulations. All of the requirements of the paragraph, however, are limited by the provisions of paragraph (c) below.
  - ii. If the contractor's subcontractor's work force is consistent with applicable employment goals, the name of said

minority group individual shall be maintained on a waiting list for first consideration in the event the contractor's or subcontractor's work force is no longer consistent with the applicable employment goal.

- iii. If for any reason said contractor or subcontractor determines said minority group individual is not qualified or if said individual qualifies as an advance trainee or apprentice, said contractor or subcontractor shall inform said individual in writing with the reasons for the determination and maintain copy in its files, and send a copy to the Public Agency Compliance Officer and the Affirmative Action Office.

- 7. To keep a complete and accurate record of all requests made for the referral of works in any trade covered by the contract, and said records shall be kept on forms made available by the Affirmative Action Office and shall be submitted promptly to that office upon request.

- C. The contractor or subcontractor agrees that nothing contained in the preceding provision(3) shall preclude the contractor or subcontractor from complying with hiring all apprenticeship provisions in any applicable collective bargaining agreement and where required by custom or agreement, it shall send journeymen and trainees to the union for referral or to the apprenticeship program for admission, pursuant to such agreement or arrangements; provided, however, that where the practices of a union or apprenticeship program will result in the exclusion or minority persons or the failure to refer minority group persons consistent with the county employment goal, the contractor or subcontractor shall not be required to employ minority advanced trainees and trained in numbers which result in the employment of advanced trainees as percentage of the total work force for construction, trade, which percentage significantly exceeds the apprentice to journey worker ratio specified in the applicable collective bargaining agreement, or in the absence of a collective bargaining agreement, exceeds the ratio established by practice in the area for said construction trade. Also the contractor or subcontractor agrees that, in implementing the procedures of the preceding provision (b), it shall, where practicable, employ minority workers residing within the geographical jurisdiction of the residing union.

- D. The contractor agrees to complete monthly Project Manning Reports on forms provided by the Affirmative Action Office or in the form prescribed by the Affirmative Action Office and submit a copy of said form no later than three(3) days after signing a construction contract and said form once a month thereafter for the duration of this contract the Affirmative Action Office and to the Public Agency Compliance Officer. The contractor agrees to cooperate with the Public Agency in the payment of budgeted

funds, as if necessary, for on-the-job programs for outreach and training of minority trainees employed on the construction projects.

Provision 4 and 5 not required for contractors or subcontractors with four(4) or fewer employees or a contractor who has presented evidence of a Federally approved or sanctioned Affirmative Action Program.
